Summary

Software Testing student at Delta University for Science and Technology, Faculty of Information Technology, majoring in Software Engineering. Hands-on experience in Manual Testing, Test Case Design, Bug Reporting, and understanding SDLC and STLC. Strong foundation in Java, C, C++, SQL, and Query Language, supporting software quality, functionality, and system reliability.

Professional Experience

- **Software Testing Trainee | Digital Egypt Pioneers Initiative (DEPI)** Nov 28, 2025 – Jul 16, 2026(Expected)
  - Studying Software Testing fundamentals including Manual Testing, Test Case Design, and Bug Reporting.
  - Gaining practical exposure to software quality assurance practices and testing methodologies.
  - Developing essential soft skills related to communication, teamwork, and professional conduct.
- **Frontend Development Trainee | Workers of Egypt Complex (CPC)** Aug 2024
  - Completed an intensive training program in Frontend Development fundamentals.
  - Studied HTML and CSS for building structured and styled web pages.
  - Developed a basic understanding of UI layout, web page structure, and responsive design principles.

Education **Bachelor of Information Technology (In Progress) | Faculty of Industrial Technology and Energy**

Delta Technological University Start Year:

2023 | Expected Graduation: 2027

Projects

Restaurant Website System Tech

Stack:

- Front-End: React (HTML, CSS, JavaScript)
- Back-End: Node.js + Express
- Database: MongoDB
- Payment Integration: Stripe / PayPal

Project Description:

Developed a full-stack restaurant management system with customer-facing and admin interfaces.

Key Features:

- Interactive menu with categories, item details, and online ordering.

- Real-time table reservation system.
- Shopping cart with secure online payment.
- Customer dashboard to track order status.
- Admin dashboard for menu management, order tracking, inventory control, and sales reports.

NASA Space Apps Challenge Participant | Disaster Prediction Project

- Collaborated within a team of 3 members to develop a solution focused on predicting natural disasters.
- Successfully completed and submitted the project ahead of the official deadline, demonstrating strong time management and technical discipline.
- Researched and implemented data-driven models to enhance the accuracy of disaster forecasting and early warning systems.
- Developed both the Front-End and Back-End of the project, integrating with MongoDB for database management.
- Created a professional video presentation documenting all stages of the competition.
- Earned an official participation certificate from NASA Space Apps in recognition of the project efforts.

Languages

- Arabic – Native Language
- English – (Reading & Writing) Good | (Listening & Speaking) Good

Technical Skills

- Basic Programming Concepts
- Bug Reporting
- Test Documentation
- Software Quality Assurance (QA) ● SDLC & STLC
- Basic Programming Concepts
- Manual Testing
- Java, C, C++
- SQL, Query Language
- HTML, CSS

Personal Skills

- Expert Soft Skills Facilitator (Negotiation, Communication, Time Management), significantly improving trainees' professional performance
- Problem Solving
- Continuous Learning
- Teamwork, Adaptability Attention to Detail
